

Emergency evacuation volcano eruption at Svartsengi

In the event of an volcanic gas/eruption at Grindavík/Svartsengi, **112/AST** will carry out the following actions to ensure an emergency evacuation:

SMS notifications to all mobile phones in the area in Icelandic, English

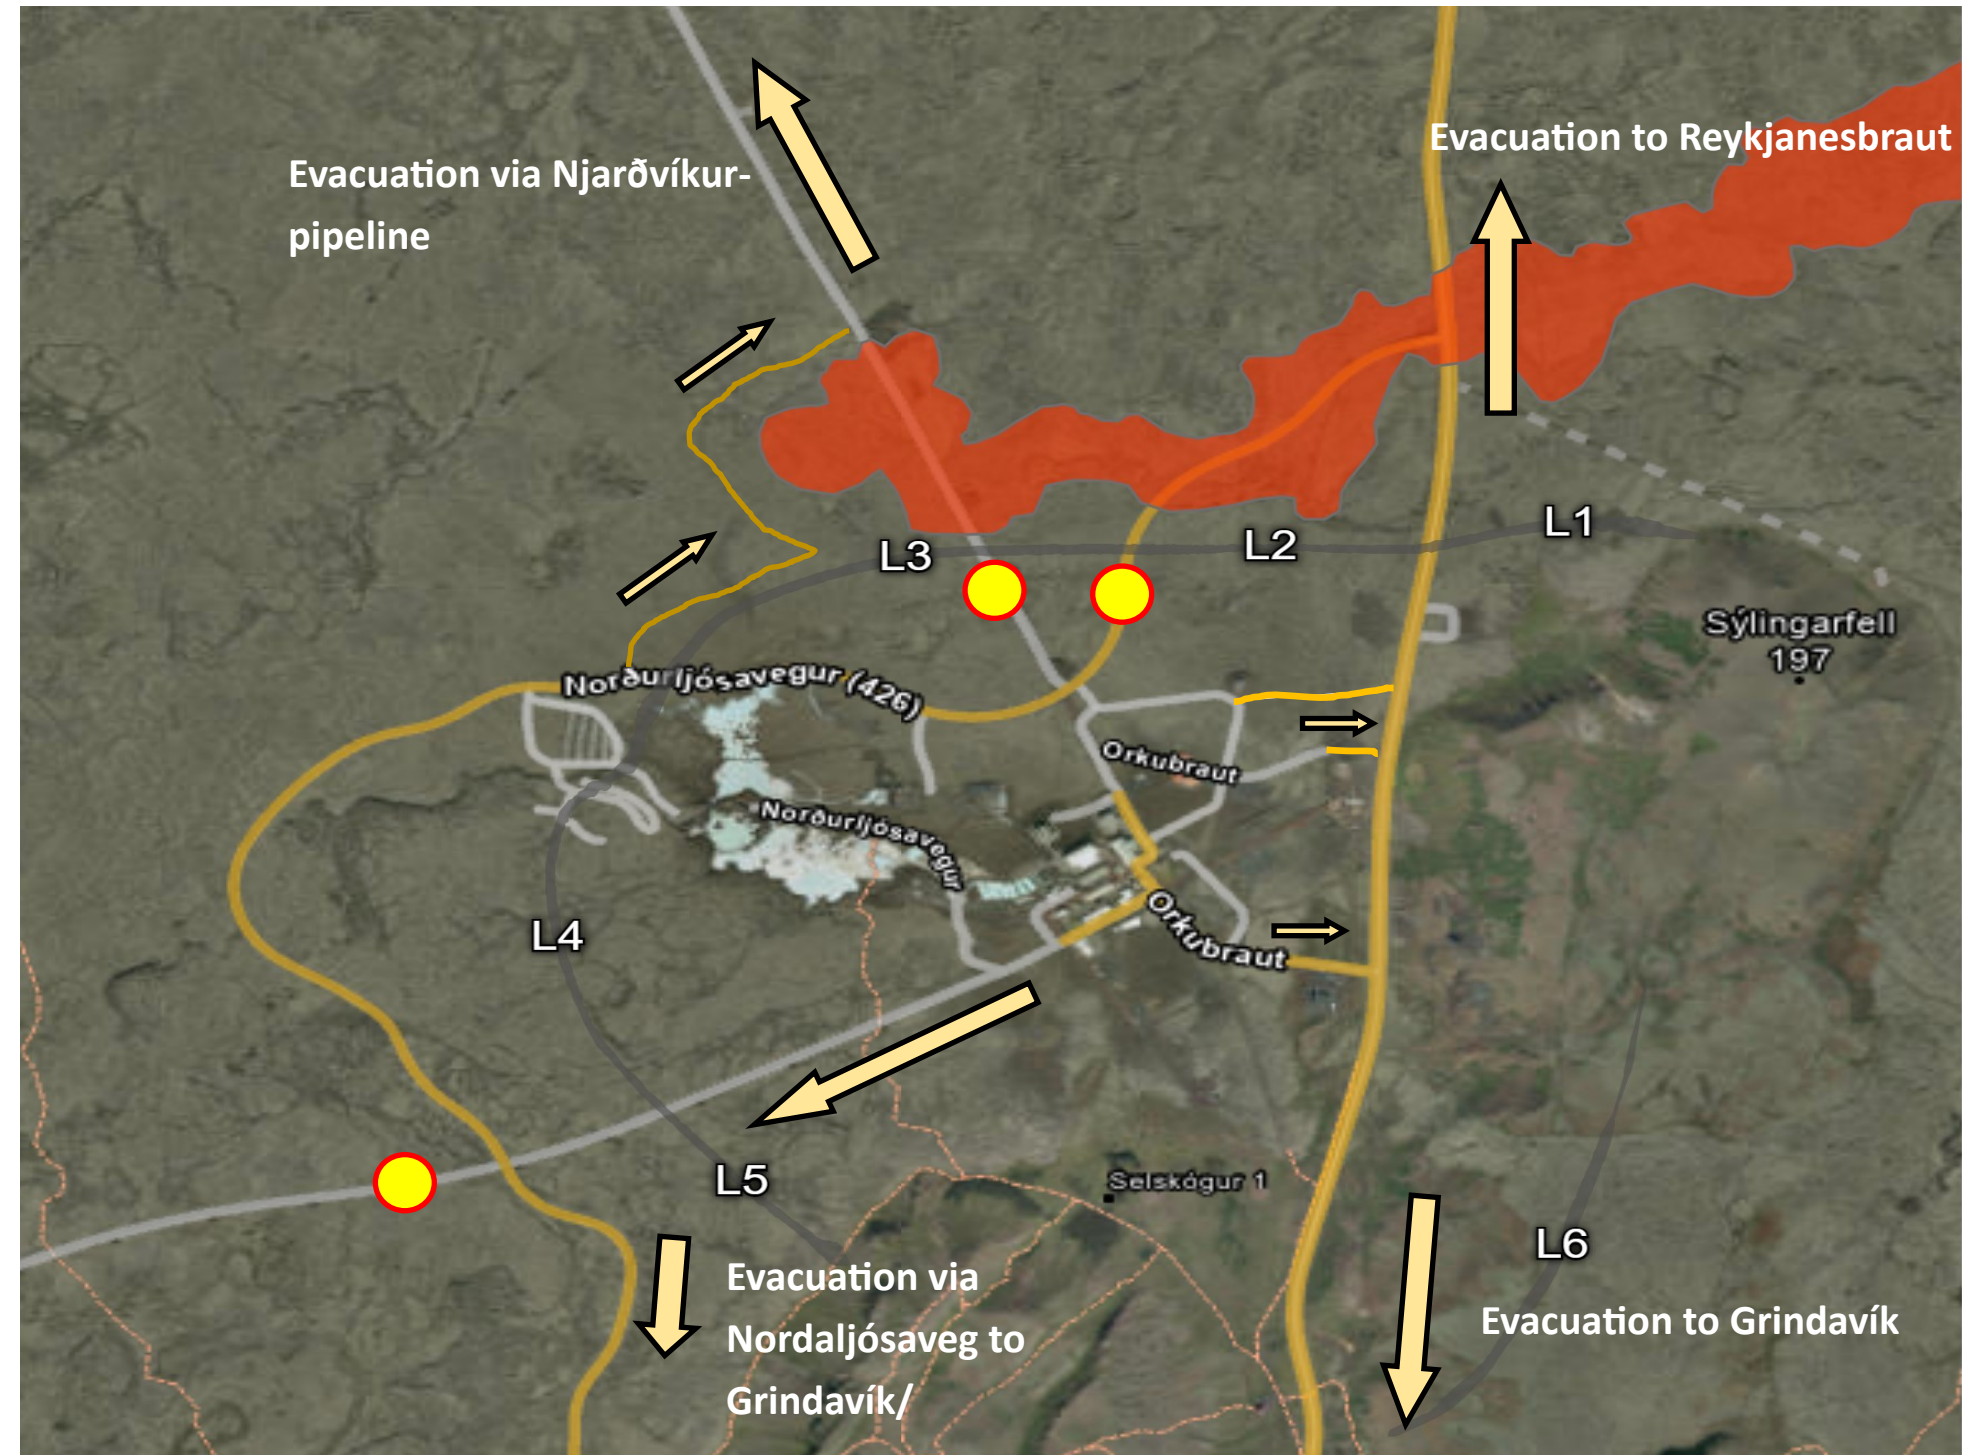

Activate the evacuation sirens located in Grindavík, Svartsengi and Blue Lagoon.

Reaction to everyone in the area:

Ensure the safety of yourself and other persons in the area

Evacuate the site and take cautiousness to ensure that everyone can escape the area

Obey the instructions of the evacuation manager/supervisors and/or emergency responders

Based on the current threat, consider the best evacuation route

During an emergency evacuation, the following must be ensured:

- ⇒ All workers in Svartsengi leave the site directly
- ⇒ Ensure communication with those employees who cannot be reached to confirm evacuation
- ⇒ Notify all accidents and hazardous crises immediately to closest first responder or **112**
